There are no Warranties for used products or products that have been repaired, altered, modified, subjected to misuse, negligence, accident or ordinary wear and tear.

Warranty registration must be on file and/or proof of original purchase (detailed and dated receipt) required for warranty registration, see form below.

Truxedo customer service at 877-878-9336 to register your TruXedo® Edge. Warranty registration must be on file and/or proof of original purchase (detailed and dated receipt) required for warranty registration, see form below.

TruXedo warrants that all new, unused products are free from defects in material and workmanship. This Five Year Limited Warranty is effective if the product is properly installed and used for the purpose intended. It applies to the original buyer only. TruXedo’s obligation under this Warranty is limited to repairing, or at its option, replacing any part that is returned, transportation prepaid, to TruXedo, Inc. Yankton, South Dakota, if the product is, in our judgment, defective. All materials must be accompanied by an RMA (Returned Material Authorization) number requested by and authorized in advance of returning the materials. TruXedo shall not be liable or responsible to supply or pay labor to replace any part found defective, nor shall it be liable for any damages of any kind or nature to person, product, or property.

**SIDE RAIL & COVER INSTALLATION**

**STEP 1:** Place side rails on truck box compressing front rail seal slightly. Rails must be flush with box rail and level with each other. Starting at tailgate, evenly space 3 clamps along each side rail, leaving about 8” on each end.

**NOTE:** High Bed Caps – Adjust side rail height if needed in order to get a good seal at front and back of cover.

**WARNING** Tighten clamps securely on side rails before driving vehicle.

**STEP 2:** For optimum latching performance and cover fit, side rails must be level. To adjust rails, loosen screws and reposition male clamps higher or lower. Tighten all clamps.

**STEP 3:** Set cover assembly across cab end of side rails. Insert square head cap screws through slots in side rails. Secure with plastic washers and lock nuts. Finger tighten.

**STEP 4:** Set cover assembly behind cab with header seal on top of rail.

**STEP 5:** Tighten bolts but do not over tighten. Header must be free to slide.

**STEP 6:** Unroll cover toward tailgate and rest bows on side rails. Rotate header into header stops and press down to lock toggle into header. Cover must be closed before closing the tailgate.

**NOTE:** If tailgate has a key lock, Edge® Tonneau Cover is secured until tailgate is unlocked and opened.

**STEP 7:** Secure hook and loop fastener strips on one side of rail, by pressing along full length of rail. Pull cover tight across pickup box, and secure hook and loop fasteners on opposite side rail.

**STEP 8:** To release cover, Trigger pull rear release toggle. Start rolling cover toward cab making sure both sides of cover roll evenly. For best results leave unrolled portion of cover attached to the hook and loop fasteners while opening.

**STEP 9:** Secure cover open by hooking safety straps to front loops.

**STEP 10:** Set tension during warmest part of day. With cover closed, release hook and loop fasteners from both side rails near cab. Roll cover opened and rotate tension controls to adjust. Close cover and recheck. Repeat until satisfactory tension is achieved.

**TROUBLE SHOOTING**

**HEADER WILL NOT LATCH:**
- Check side rails to make sure they are level (Step 2).
- Make sure the header seal is not caught between the side rail and the header.
- Check position of side rails on pickup box - they may be positioned too low (Step 1).
- Check cover tension after installation, seasonally, and after extreme temperature changes.

**FABRIC COVER IS TOO TIGHT OR TOO LOOSE:** Adjust tension (Step 10).

**FABRIC COVER IS SHIFTED TOO FAR TO ONE SIDE:** Unlatch the cover at the tailgate, release the Velcro along both sides, go to the shorter side of the tarp and tug. The fabric will slide in the opposite side of the tarp and lug. The fabric will slide in the header stop.

**FABRIC COVER IS TOO TIGHT OR TOO LOOSE:** Adjust tension (Step 10).
