

NISSAN TITAN DEUCE 2

These instructions replace steps 2 and 3 in the Deuce 2 owners manual.

Clamp half 1703481 is installed in the Utility Track.

NOTE: If your Nissan Titan pickup does not have utility tracks, then install the Deuce 2 side rails as shown in your Truxedo Lo Pro Deuce 2 Owners Manual 1117648.

CAUTION
Tighten clamp assemblies securely on side rails before driving vehicle.

Item	Part #	Description
1.	1703482	MALE CLAMP
2.	1703481	FEMALE CLAMP
3.	1700369	CAP SCREW 3/8" X 1 3/4"
4.	1700429	FLAT WASHER 3/8"

1 Install Underbody Rails: Slide 2 female clamp halves (1703481) into the track system as shown below. Using a grease pen, make a mark 30 1/4" back from the bulkhead. Position the rear of the underbody rail flush with the mark you have made. The underbody rail will sit above the cargo track, seated against both the inside and top of the pickup bed rail. With the underbody rail in place, insert the bolt through the washer, the male clamp half, and into the female clamp half that you slid into the track. Tighten clamps to secure underbody rail in place.

Picture above shows underbody rail correctly installed to track system.

2 Install Underbody Rails: Slide 2 additional female clamp halves into the track system behind the underbody rail. Position the front of the side rail end to end, touching the rear of the underbody rail. The side rail will also sit above the cargo track, against both the inside and top of the pickup bed rail. With the side rail in place (pushing down to compress the weather seal), insert the bolt through the washer, the male clamp half, and into the female clamp half that you slid into the track. Tighten clamps to secure the side rail in place. Repeat steps 1 & 2 on Passenger Side.

Picture above shows side rail correctly installed to track system.

To finish installation, continue with step 4 in the Deuce 2 manual.
